BDCP Checkpoint Concurrence Process and Timeline with USACE-EPA Coordination

The following process and timeline applies to the Section 404/10 and Section 408 permitting.

DWR organizes a Checkpoint Meeting/call for discussion. DWR sends checkpoint information packet at least **10 days** prior to the Coordination Meeting.

Corps forwards information to EPA upon receipt. EPA provides input to Corps at least 2 working days prior to the Checkpoint Meeting with DWR.

Signatory Agencies participate in Checkpoint meeting.

USACE and EPA discuss the outcome of the Checkpoint meeting as soon as possible.

DWR sends formal written request for USACE responses on Checkpoint.

USACE notifies EPA upon receipt of formal written request and schedules meeting with EPA a minimum of 14 calendar days before USACE expected response. EPA provides input to Corps within 15 calendar days of formal written request receipt.

USACE sends written response (concur/non-concur) to DWR Checkpoint request within **30** calendar days.

USACE provides courtesy copy to EPA.

If USACE issues a non-concurrence letter it must identify the basis for non-concurrence. If USACE does not respond within 30 calendar days DWR may initiate mid-level elevation as discussed below.
